How to use a Custom Home Page

The home page provides a landing point for students.

Creating an easy to use and engaging home page can clarify information and encourage community support for students throughout your course.

An effective and inviting home page should include the following:

- Instructor (and TA) Name(s) and contact information
- Tips for success, as well as procedures in the course
- Meeting time and location

Creating a Custom Home Page

Using the Pages Tool, you will need to create a page, and then select that page as the Front Page.

Engaging via Home Page

It is recommended that your home page include an engaging banner or image relevant to the subject.

A well-made home page will provide the students an overview of the flow of your course.

Steps to Customizing a Home Page

Set a Front Page

Start by clicking Pages in the Course Navigation menu, then by clicking the View All Pages button. Next, locate the page you want as your front page in the list. From there,

1. Click on the settings icon (the three dots) to the right of the page title.
2. Select Use as Front Page

Note: only published pages can be set as the front page.

Select Your Home Page

1. From the Course Navigation Menu, click Home.
2. Click Choose Home Page in the top right corner.
3. Click the radio button next to the Home Page layout you prefer.
4. Click Save.
